6. Recommendations

Based on the investor's behavioral analysis, here are 4 actionable recommendations for a retail investor:

1. Set a clear investment goal and regularly review your portfolio to ensure it's aligned with your goals, rather than following the crowd.
2. Consider diversifying your portfolio by investing in a mix of low-cost index funds and individual stocks, rather than putting all your eggs in one basket.
3. Take a long-term view and avoid making emotional decisions based on short-term market fluctuations, focusing instead on the steady growth of your investments.
4. Regularly rebalance your portfolio to maintain an optimal asset allocation, rather than holding onto losing investments in the hopes of recouping losses.
