6. Recommendations

Based on the investor's behavioral analysis, here are 4 actionable recommendations for retail investors:

1. Diversify your portfolio by investing in at least 5-7 different stocks or funds to reduce your reliance on any one particular investment.
2. Set a stop-loss order for each investment to limit your potential losses if the market moves against you.
3. Take a step back and do your own research before making a trading decision, rather than following the crowd or making impulsive choices.
4. Consider setting a trading schedule that allows you to make informed, disciplined trades, rather than trying to time the market or make emotional decisions based on short-term market fluctuations.
