6. Recommendations

Based on the investor's behavioral analysis, here are 4 actionable recommendations for a retail investor:

1. Diversify your portfolio by investing in at least 5-7 different stocks or funds to avoid following the crowd and make more informed investment decisions.
2. Set a stop-loss order for each trade to limit potential losses and avoid getting caught up in a "herding" mentality that can lead to impulsive decisions.
3. Take a 30-day time frame to evaluate your investment decisions, rather than making emotional decisions based on short-term market fluctuations.
4. Educate yourself on the companies you invest in, including their financials, products, and management teams, to make more informed investment decisions and avoid following the crowd.
