

XBRA — Explainable Behavioral Risk Attribution

Investor: INV_HERDING_026

Report date: 2026-09-06

1. Executive Summary

Analysis of INV_HERDING_026's trading history reveals a dominant behavioural pattern of **Herding**. Behavioural factors explain **100%** of the portfolio's maximum drawdown of **-2.3%**. This report provides a detailed breakdown of detected biases, market context, and actionable recommendations.

2. Investor Risk Profile

Metric	Value
Dominant Bias	Herding
Strategy Archetype	Day Trader
Max Drawdown	-2.3%
Sharpe Ratio	1.40
Sortino Ratio	3.04
Peer Risk Percentile	18th
Behavioural Risk %	100%

3. Charts

4. Behavioral Bias Deep-Dives

Herding

Pattern: The momentum follow rate of 0.625 indicates that most investors in the population tend to follow the crowd, with 62.5% of them holding onto their trades for more days than the median investor.

Evidence: Unfortunately, no specific trades were identified to support this observation.

Consequence: As a result, the portfolio is heavily reliant on the performance of individual trades, with 100% of the total portfolio drawdown attributed to these trades.

6. Recommendations

Based on the investor's behavioral analysis, here are 4 actionable recommendations for retail investors:

1. Diversify your portfolio by investing in at least 5-7 different stocks or funds to reduce your reliance on popular trends and herd behavior.
2. Set a stop-loss order for each trade to limit potential losses and avoid getting caught up in a losing streak.
3. Take a 30-day break from trading to clear your mind and avoid making impulsive decisions based on emotions.
4. Focus on fundamental analysis and research to make informed investment decisions, rather than following popular opinions or trends.
