6. Recommendations

Based on the investor's behavioral analysis, here are 4 actionable recommendations for retail investors:

1. Diversify your portfolio by investing in at least 5-7 different stocks or funds to reduce your reliance on popular trends and herd behavior.
2. Set a stop-loss order for each trade to limit potential losses and avoid getting caught up in a losing streak.
3. Take a break from the markets for at least a day or two before making a trade to clear your head and avoid impulsive decisions.
4. Focus on fundamental analysis and research to make informed investment decisions, rather than following popular opinions or trends.
