6. Recommendations

Based on the investor's behavioral analysis, here are 4 actionable recommendations for a retail investor:

1. Set a stop-loss order to limit potential losses, so you can cut your losses quickly and move on from a losing trade.
2. Take calculated risks, but prioritize small, manageable positions to avoid significant losses and maintain a stable portfolio.
3. Focus on the potential gains from each trade, rather than dwelling on the fear of losses, to help you stay motivated and confident in your investment decisions.
4. Regularly review and adjust your investment strategy to ensure it remains aligned with your risk tolerance and goals, making adjustments as needed to avoid emotional decision-making.
