6. Recommendations

Based on the investor's behavioural analysis, here are 4 actionable recommendations for a retail investor:

1. Set a stop-loss order to limit potential losses, rather than trying to time the market perfectly, to avoid emotional decision-making.
2. Focus on making small, consistent gains each day, rather than trying to make a single big trade, to reduce the impact of loss aversion.
3. Use a "trailing stop" strategy to automatically adjust the stop-loss order as the trade moves in your favor, to avoid missing out on potential gains.
4. Take regular breaks and practice self-reflection to recognize when loss aversion is taking over, and make adjustments to your strategy to stay focused on long-term goals.
