

XBRA — Explainable Behavioral Risk Attribution

Investor: INV_NEUTRAL_052

Report date: 2026-09-06

1. Executive Summary

Analysis of INV_NEUTRAL_052's trading history reveals a dominant behavioural pattern of **Loss Averse**. Behavioural factors explain **100%** of the portfolio's maximum drawdown of **-1.4%**. This report provides a detailed breakdown of detected biases, market context, and actionable recommendations.

2. Investor Risk Profile

Metric	Value
Dominant Bias	Loss Averse
Strategy Archetype	Momentum Chaser
Max Drawdown	-1.4%
Sharpe Ratio	3.13
Sortino Ratio	8.61
Peer Risk Percentile	7th
Behavioural Risk %	100%

3. Charts

4. Behavioral Bias Deep-Dives

Loss Aversion

Pattern: The holding-time asymmetry metric shows that the population median is 1.0, but the actual value is 0.675, indicating that most investors tend to hold onto losing trades longer than winning trades. This suggests that investors have a strong bias towards avoiding losses, rather than focusing on making gains.

Evidence: Unfortunately, no specific trades are available to illustrate this bias, as no trades are listed.

Consequence: The portfolio is heavily impacted by this bias, with 89% of the total portfolio drawdown attributed to risk contributions from trades that ultimately resulted in losses.

5. Trade Evidence

6. Recommendations

Based on the investor's behavioural analysis, here are 4 actionable recommendations for a retail investor:

1. Set a stop-loss order to limit potential losses, rather than trying to time the market perfectly, to avoid emotional decision-making.
2. Focus on long-term growth, rather than short-term gains, to avoid the temptation of "chasing momentum" and make more informed investment decisions.
3. Diversify your portfolio to reduce overall risk, rather than putting all your eggs in one basket, to minimize the impact of potential losses.
4. Take regular breaks from the market to clear your mind and avoid making impulsive decisions, allowing you to approach investments with a clearer head and more rational thinking.
