Sharpe Ratio	6.38
Sortino Ratio	15.90
Peer Risk Percentile	2th
Behavioural Risk %	100%

3. Charts

4. Behavioral Bias Deep-Dives

Disposition

Pattern: The Early Exit Winner Rate metric shows that the investor tends to exit winning trades relatively quickly, with a rate of 0.4583, which is higher than the population median of 0.4318. This suggests that the investor is willing to cut their losses and lock in profits relatively early.

Evidence: Unfortunately, no specific trades are available to provide evidence for this pattern.

Consequence: The investor's early exit strategy has contributed to a significant risk in the portfolio, with 61% of the total portfolio drawdown, indicating that the investor's decisions have had a substantial impact on the overall performance of the portfolio.

6. Recommendations

Based on the investor's behavioral analysis, here are 4 actionable recommendations for retail investors:

1. Take a step back from the market and set a clear, long-term investment goal to help you make more informed decisions.
2. Limit your exposure to high-risk, high-reward investments and focus on more stable, growth-oriented options.
3. Develop a disciplined investment routine, including regular portfolio reviews and rebalancing, to avoid emotional decision-making.
4. Consider working with a financial advisor or using a robo-advisor to help you stay on track and avoid costly mistakes.
